EXPERIENCE

Montclair State University

Aug 2025 – Present

Research Assistant, School of Computing

1. Design and implement experiments in **beyond-backpropagation learning** and **distributed DNN/GNN training**, using **PyTorch** on university HPC GPU servers.
2. Authored two conference papers on split learning and beyond-backpropagation training; analyze results and write manuscripts on efficient distributed AI.

TS4U LLC

Dec 2022 – Apr 2024

DevOps Engineer

1. Cut AWS provisioning time **30%** with **Terraform** and **Ansible**; built reusable modules with remote state for development, staging, and production environments.
2. Built GitLab CI/CD and Jenkins pipelines covering automated tests, **Docker** image builds, **ECR** publishing, and Kubernetes deployments with approval gates and rollback workflows.
3. Operated production **Kubernetes** workloads on AWS EKS using Helm, ingress, health checks, resource limits, and autoscaling; diagnosed failed pods and deployment issues.
4. Configured **IAM**, security groups, load balancers, DNS/TLS, secrets management, and backups for production microservice environments.
5. Created **Grafana** dashboards and **Prometheus** alerts, centralized logs with EFK, and investigated production incidents using monitoring and log data.

EDUCATION

Montclair State University — MS Computer Science, GPA 4.00/4.00

Expected Dec 2026

Chittagong Independent University — BS Computer Science & Engineering, GPA 3.90/4.00

Aug 2022

PROJECTS

Urban Bangla Python · Flask · MongoDB

github.com/zihadbappy/urbanbangla

Bengali community dictionary with Google authentication, word submissions, search, voting, and pagination — built, tested, and deployed end to end.

WebRTC Video Chat JavaScript · WebRTC

github.com/zihadbappy/WebRTC-VidChat

Browser-based room-based peer-to-peer video communication through the WebRTC API.

TECHNICAL SKILLS

Languages Python, Bash, SQL, JavaScript, Java

Cloud AWS (EC2, VPC, IAM, S3, RDS, ECR, EKS, CloudFormation), DNS/TLS

Infrastructure Terraform, Ansible, Docker, Kubernetes, Helm, secrets management

CI/CD & Observability GitLab CI/CD, Jenkins, GitOps, Prometheus, Grafana, EFK

Development REST APIs, unit/integration testing, code reviews, Flask, MongoDB, PyTorch

RESEARCH

Decoupled Split Learning via Auxiliary Loss — first author

2026

Presented at the ICCN Workshop, IEEE INFOCOM 2026 — Tokyo, Japan.
